DETAILED ACTION

1. This Office Action is in response to the Preliminary Amendment filed March 30, 2001. Claims 1-22 were canceled and claims 23-38 have been added. Claims 23-38 are now pending.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 23-26, drawn to a process to prepare a cyclopentadienylic compound, classified in class 556, subclass 52.
 - II. Claims 27-31, drawn to a a cyclopentadiene ligand and a catalyst, classified in class 502, subclass 152.
 - III. Claims 32-38, drawn to a process to polymerize olefins, classified in class 526, subclass 160.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be

Art Unit: 1713

made by another and materially different process (MPEP § 806.05(f)). The process as claimed can be used to make other and materially different product such as a ketone.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relates to a process to prepare a cyclopentadienylic compound and a process to polymerize olefins.

Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as isomerization or hydrogenation.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Whitney Wilson. on April 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1713

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion
